

Managed Attribution

Get closer to the source than ever before. Flashpoint's Managed Attribution is a flexible, fully managed virtual environment that lets security teams focus on what matters most. Analysts can spend their time researching threats instead of building technology to do so.

Protect your employees' computers and network

Interact with files and browse safely without risk to your organization. Managed Attribution is fully isolated from your browsers, computers, and network infrastructure to protect from malware and other malicious online threats

Manipulate your digital fingerprint

Conceal your organization's digital perimeter by configuring your traffic to originate from anywhere in the world. Choose your machine and gateway locations, operating system, browser, tools, timezone, and much more

Make intelligence actionable

Conduct thorough online investigations by going directly to the source- with full technical anonymity in a safe and isolated workspace

Deepen your research capabilities

Reduce manual effort and streamline day-to-day operations in a centrally managed workspace. Empower your team to use the best tools to engage online with confidence

Fully-managed virtual environments tailored to your teams:

FLEX

A flexible virtual environment that scales with your growing team. We'll handle everything from infrastructure to third-party contracts, so you can spend your time researching.

DEDICATED

A standalone dedicated virtual environment for larger teams. Leverage additional capabilities like file sharing and session videos to meet compliance needs.

ABOUT FLASHPOINT

Trusted by governments, global commercial companies, and educational institutions, Flashpoint helps organizations protect their most critical assets, infrastructure, and stakeholders from security risks such as cyber threats, ransomware, fraud, physical threats, and more. Leading security practitioners—including cyber threat intelligence (CTI), vulnerability management, DevSecOps and vendor risk management teams—rely on the Flashpoint Intelligence Platform to proactively identify and mitigate risk and stay ahead of the evolving threat landscape.
